

Data sheet

# Pressure test valve

## Type MBV 5000

The pressure test valve, type MBV 5000 is a part of the block concept which has been developed to save space, weight and costs. The test valve is intended for use in many applications, for example monitoring, alarm indication, shut-down, diagnosing on equipment such as motors, gears, thrusters, pumps, filters, compressors etc.

The block valve is designed in many different configurations for use in the marine industry. The valve meets demands for fast installation, simple isolation and easy test pressure connection. In addition to the test valves the block concept consists of block pressure and temperature controls – type MBC, block pressure transmitters – type MBS and accessories.

The test valves meet the strict demands on marine equipment, including EU stipulations on such products.

### Features

- Compact design
- Many configuration possibilities
- Low installation cost
- Fast and easy to operate
- Aluminum version suitable for liquid media only. Stainless steel version for liquid and air

## Technical data

## Performance

Pressure	Operating pressure	0 – 180 bar 0 – 60 bar <sup>1)</sup>
	Burst pressure	720 bar 240 bar <sup>1)</sup>
Temperature	Operating temperature	-20 – 120 °C
	Ambient temperature	-20 – 120 °C
	Temperature of medium	-20 – 120 °C

<sup>1)</sup> For 061B7055 MBV 5000-2211S only

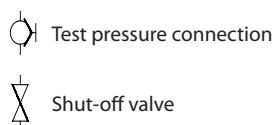

## Mechanical specification

Material	Housing	AW-6082T6 (AlMgSi1)
	Nipple	AW-6082T6 (AlMgSi1)
	Ball	stainless steel 1.4404
	Gasket	PEEK/FPM
Material for stainless steel version	Housing	stainless steel 1.4401
	Nipple	stainless steel 1.4401
	Ball	stainless steel 1.4404
	Gasket	PEEK/FPM
Pressure connection	Input	G 1/4
	Output	Flange / M5 x 8

## Specification and code numbers for standard types

Pressure connection: G 1/4. Test pressure connection: M16 x 2

Type no.	Symbol	Type	Output no.	Weight [kg]	Length [mm]	Height [mm]	Width [mm]	Code no.
